FALL 2026 · ASSESSMENT REPORT

Midterm 1.

Grades & question analysis

Updated grades + eight additional exams + official roster · Nov 11, 2026 · 175 exams

175	14.61 / 21	15.00 / 21	3.52	0.729
Students included	Mean score	Median score	Standard deviation	KR-20 / Cronbach's α
All answer sets resolved	69.6% average	Middle of the score distribution	Sample SD · n − 1	All 21 questions included

● **All answer sets resolved.** All 175 exams and all 21 questions are included. Reviewed blank answers receive zero points.

Official roster: 174 one-to-one matches · 1 auditor · 0 roster records without an exam.

ADDITIONAL EXAMS · GRADEBOOK CHECKLIST

Eight grades to enter

8 new exams matched one-to-one to the eight previously missing roster records. The pool is now 175 exams: 174 enrolled students plus one auditor. Enter the eight scores below in the gradebook.

Student	SIS student ID	Previous grade	Final / 21	Percent	Action
Matteo Godinez ↗	923167554	Ungraded	**19 / 21**	90.5%	Enter grade
Achintya Jaimini ↗	921802112	Ungraded	**9 / 21**	42.9%	Enter grade
Rishi Kumar ↗	922196416	Ungraded	**18 / 21**	85.7%	Enter grade
Angelina Lai ↗	922549186	Ungraded	**17 / 21**	81.0%	Enter grade
Rajeev Raghuram ↗	921791508	Ungraded	**8 / 21**	38.1%	Enter grade
Giorgi Tsiklauri ↗	921207898	Ungraded	**16 / 21**	76.2%	Enter grade
Matangi Venkatakrishnan ↗	921362733	Ungraded	**11 / 21**	52.4%	Enter grade
Liz Voloshin ↗	921331450	Ungraded	**17 / 21**	81.0%	Enter grade

These are additions to previously ungraded roster records. The original 167 exam grades and answers are unchanged. No curve or extra credit has been applied.

READING DECISIONS

What was checked

Matteo Godinez: All 21 bubble rows visually checked; all selections are clear. The source filename includes Alessandro; the written SIS ID matches roster name Matteo Godinez.

Achintya Jaimini: Q6=B and Q8=B: dark final selections; the lighter A/H marks are erased. Q12=A and Q19=F also have clearly erased alternatives. All 21 bubble rows visually checked.

Rishi Kumar: All 21 bubble rows visually checked; all selections are clear.

Angelina Lai: All 21 bubble rows visually checked; all selections are clear.

Rajeev Raghuram: Q11, Q16 and Q19 are blank on both the answer sheet and the corresponding questionnaire sections. Confirmed blanks earn zero. All 21 bubble rows visually checked.

Giorgi Tsiklauri: Q7=C, Q16=B and Q18=H: dark final selections distinguished from erased alternatives. All 21 bubble rows visually checked.

Matangi Venkatakrishnan: All 21 bubble rows visually checked; all selections are clear.

Liz Voloshin: The answer sheet on PDF page 7 is entirely blank. All 21 answers were transcribed from the single circled choices on questionnaire pages 1–6. The questionnaire header reads Elizabeth Voloshin, ID 921331450, matching roster entry Liz Voloshin.

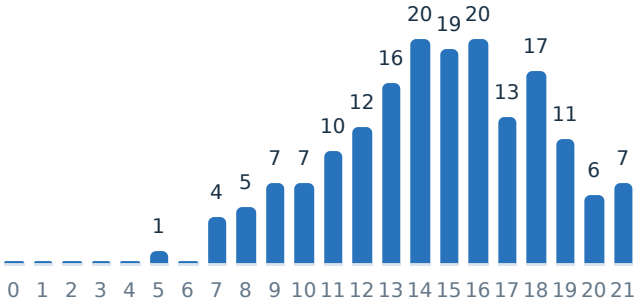

All additional exams use V0, verified from Q15 and the questionnaire choice layout. Mean changed from 14.62 to 14.61/21; sample SD changed from 3.49 to 3.52.

No unresolved answer or roster ambiguities remain.

CLASS PERFORMANCE

Score distribution

Range 5–21 / 21

Horizontal axis: points out of 21. Vertical bars: number of students.

25th percentile **12** Median **15** 75th percentile **17**

CONTENT AREAS

Performance by topic

Image processing	**78.1%**
Generalization and transfer	**75.6%**
Network layers	**62.4%**
Optimization and gradients	**64.5%**
Object detection	**62.3%**
Version marker	**100.0%**

Average proportion correct across the questions in each topic.

QUESTIONS TO DISCUSS

Most frequently missed

Q7 Residual connections
115 of 175 answered incorrectly
34.3% correct

Q18 Max-pooling backpropagation
105 of 175 answered incorrectly
40.0% correct

Q16 ReLU backpropagation
104 of 175 answered incorrectly
40.6% correct

These items had the lowest correct-response rates. Select an item to inspect its response distribution.

EXAM VERSIONS

Version comparison

Version	N	Mean / 21	Median	Sample SD
V0	51	14.73	15.00	3.78
V1	34	14.74	15.50	3.13
V2	37	14.84	15.00	3.47
V3	53	14.25	15.00	3.61

Descriptive statistics for each version, using the corresponding answer key.

ITEM ANALYSIS

All 21 questions

Mean is the proportion correct (0–1); SD is the sample standard deviation of each question’s 0/1 score.

Question	N	Correct	Mean (0–1)	Sample SD	Item–rest r	Blank
Q1· Box filtering ↗	175	96.0%	0.960	0.197	0.232	0

64	Francisco Chen ↗ Auditor	921681618	V3	**12** / 21	57.1%

Official roster names and SIS IDs are used for matched records. The instructor-confirmed auditor retains his source name and ID and remains included in the exam statistics.

ONE-TO-ONE RECONCILIATION

Matched to the official roster

Each matched exam belongs to one roster student, and no roster student is used twice. The auditor is labeled separately; there are no unresolved matches.

174	174	0	1

Auditor

Record	Name on exam	Written / transcribed ID	Score / 21	Version
64	Francisco Chen ↗	921681618	12	V3

The instructor confirmed Francisco Chen is auditing. His score is included in the distribution and all exam statistics, and he is not expected on the enrollment roster.

Roster completion

Official roster name	SIS student ID	Grade

All 174 enrolled students now have a matched exam. There are no missing roster exams.

SCORING & PROVENANCE

How to read this report

- All 21 questions, including Q15, count equally: 1 point each, 21 total.
- Every score was checked against the updated answers and the correct exam-version key.
- All 175 answer sets are resolved. Reviewed blank answers count as incorrect.
- Identity and extra-mark flags do not affect scores, per instructor instruction.
- Official names and SIS IDs come from the supplied roster where a one-to-one match was established. No roster student receives more than one exam.
- All 175 exams remain in the exam statistics, including the instructor-confirmed auditor. All 174 enrolled students have a matched exam.
- The additional ZIP contributes 8 exams. Every bubble row was visually checked; Liz Voloshin's answers are the single circled choices on questionnaire pages 1–6 because her answer sheet is blank. Rajeev Raghuram's Q11, Q16 and Q19 are confirmed blank and earn zero.
- All 167 previously published exam scores and answer sets are preserved unchanged.
- Standard deviations use the sample formula (n − 1).
- Item–rest correlation compares each 0/1 item score with the total of the other 20 items. Constant items have no defined correlation.
- KR-20 / Cronbach's alpha uses all 21 binary question scores.
- Choice frequencies are aligned by answer text across exam versions; displayed A–H labels refer to V0.
